Award-winning TETRA PRO CO₂ laser launches

INTRODUCING TETRA PRO, DEKA'S NEW CO₂ LASER TECHNOLOGY THAT PROVIDES REVOLUTIONARY PRECISION IN MICRO-ABLATIVE PROCEDURES.

An increasing number of people of all ages are turning to fractional CO₂ laser skin resurfacing, yet the modern lifestyle demands noticeable results without the lengthy downtime. Enter the Tetra PRO, a new CO₂ laser with a wide range of skin resurfacing indications, including the award-winning CoolPeel® treatment.

Winner of the 2024 AMWC Aesthetic Medicine Awards for the Best Laser, Lights and Energy-

Based Device, Tetra PRO is a cutting-edge laser system that provides unparalleled precision and innovation.

Featuring Deka's proprietary Pulse Shape Design® (PSD) technology, Tetra PRO delivers powerful performance levels never achieved before in dermatological applications.

TAILORED TREATMENT WITH PULSE SHAPE DESIGN® AND SMARTSTACK TECHNOLOGY

Distributed by High Tech Medical, Tetra PRO offers an exceptional degree of control and versatility, made possible through its four distinct pulse modes combined with Deka's exclusive PSD technology. This powerful combination allows aesthetic professionals to fine-tune treatment parameters with

INDICATIONS

- Skin rejuvenation
- Periocular lifting
- Deep lines and wrinkles
- Scar treatment
- Benign skin cancers, lesions, skin tags, warts, moles, etc
- Sun damage
- Pore reduction
- Pigmentation reduction

unprecedented precision.

The ability to customise fractional laser pulses with variable pulse shapes, duration, energy and peak powers to suit any skin condition and treatment area means clinicians can achieve maximum efficacy while balancing the risk factors, downtime and discomfort.

Tetra PRO also features the SmartStack function, which makes it possible to deliver laser energy in a single pulse or in several consecutive pulses (1-5) over the same place (DOT) to offer enhanced patient comfort and fast recovery while still ensuring maximum efficacy.

With increased power and a larger scanner area (20x20mm), Tetra PRO can deliver faster treatments, reducing treatment duration by as much as 30% while providing practitioners with optimal versatility and precision.

FASTER, MORE CONVENIENT COOLPEEL® TREATMENTS

The Tetra PRO CO₂ laser offers an extensive array of skin resurfacing options, including the groundbreaking CoolPeel® treatment.

CoolPeel® is the globally recognised 10-minute, almost no downtime, often no anaesthetic skin resurfacing treatment that delivers many of the benefits of CO₂ fractional resurfacing treatments without the considerable downtime

KEY FEATURES

- **Enhanced CoolPeel® treatments:** The integration of MOVEO mode makes CoolPeel® treatments faster and more convenient than ever before.
- **Versatile PSD® technology:** The four pulse modes allow for precise tailoring of treatment results and downtime, catering to a wide range of patient needs and preferences.
- **Increased efficiency:** Tetra PRO boasts a 30% faster treatment time compared to predecessors, thanks to increased power and a larger scanner area (20x20mm).
- **DOT Therapy:** Tetra PRO delivers precise and effective DOT (Dermal Optical Thermolysis) therapy.
- **Expanded treatment options:** The device is suitable for a wide range of procedures, including skin resurfacing, dermatological surgery and blepharoplasty.
- **Improved patient experience:** SmartStack function promotes faster recovery times and enhanced patient comfort.
- **New scanning systems:** Tetra PRO's scanning systems (DOT PRO, Scar 3 PRO, DermaScan) are optimised in shape, weight, size and easier connection.
- **Impressive ROI:** The combination of faster treatments and expanded capabilities and treatment offerings makes Tetra PRO a sound investment for aesthetic clinics looking to boost their bottom line.

associated with most ablative laser treatments.

CoolPeel® with Tetra PRO is now even faster and more convenient thanks to Deka's MOVEO Mode. Utilising a unique laser emission mode, CoolPeel® provides uniform, homogenous skin stimulation targeting fine lines and wrinkles, large pores, uneven skin tone and texture, age spots and other signs of ageing, and sun damage.

What sets CoolPeel apart is its ability to deliver impressive results achieving a fully-ablative effective treatment without causing thermal damage to surrounding tissue. Without thermal damage, downtime

is drastically minimised. This makes it an attractive option for patients of all ages and skin types seeking effective skin rejuvenation with minimal disruption to their daily lives.
